

WICK PARK REVITALIZATION PROJECT

Steering Committee
October 8, 2008

SHORT TERM IMPROVEMENT POSSIBILITIES

Add signage (identify park features, large stone sign)

Create multipurpose walkways (instead of dividing uses)*

Create more cohesive visual paths

Address parking (reduce footprint, scattering)*

Activate outer perimeter, calmer activities in center

Cluster picnicking areas (locations for recycling)*

Children's playground equipment takes priority

Create active and passive spaces, open spaces more active

LONG TERM IMPROVEMENT POSSIBILITIES

Multipurpose gateways at all corners (adapt identity & character of surrounding neighborhoods)

Add accessible playground equipment

Collaboration with church during demolition and redesign

Lighting improvements (emphasize specific areas)

Create area for performance

Address use of tennis courts (more use as basketball courts? Place for water features?)

Use low areas of water features for ice skating

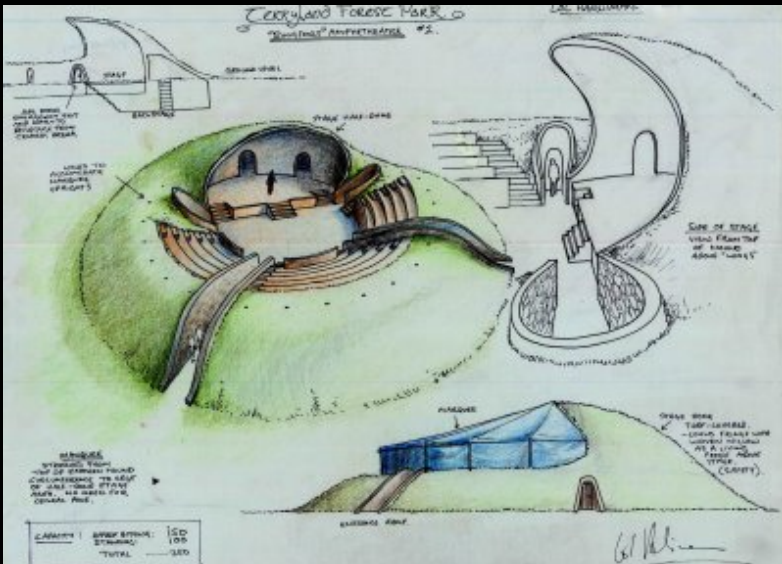

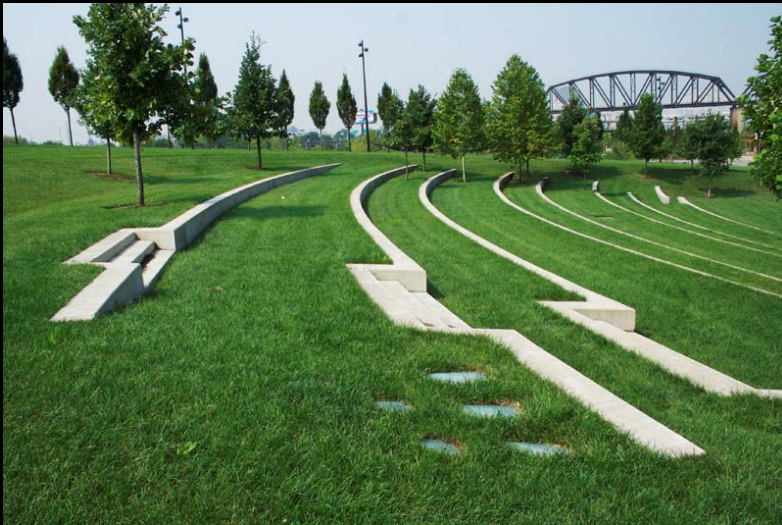

Who will the long term use of the park be catered to?

ALTERNATIVE 1

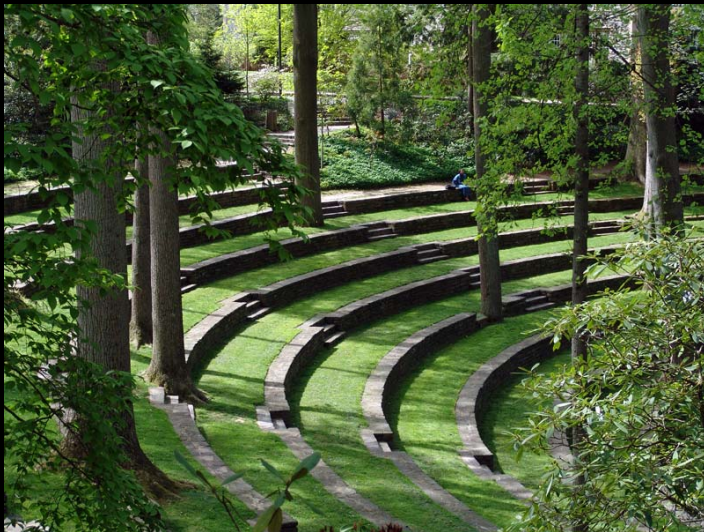

ALTERNATIVE 2

- Connection to Stan Baugh Auditorium
- Amphitheatre on the South West corner

ENTRANCE SOUTH WEST

ENTRANCE SOUTH WEST

- Path from Youngstown State
- Sense of arrival

ENTRANCE SOUTH EAST
